

RESOLUTION 2017-050

ADOPTING THE CAPITAL IMPROVEMENT PROJECT PLAN FOR FISCAL YEAR 2017-18

WHEREAS, the City of Sherwood Financial Policy IV-4 states that the City shall adopt a five-year Capital Improvement Project Plan annually; and

WHEREAS, the attached summary of the FY2017-18 Capital Improvement Project Plan represents capital improvement planning based on the current circumstances and priorities of the City; and

WHEREAS, this Capital Improvement Project Plan was the basis for projects included in the FY2017-18 Approved Budget.

NOW, THEREFORE, THE CITY OF SHERWOOD RESOLVES AS FOLLOWS:

- **Section 1.** That it hereby adopts the FY2017-18 Capital Improvement Project Plan attached hereto as Exhibit A.
- **Section 2.** This Resolution shall be effective upon its approval and adoption.

Duly passed by the City Council this 20th day of June, 2017.

Krisanna Clark, Mayor

Attest:

Sylvia Murphy, MMC, City Recorder

EXECUTIVE SUMMARY

SHERWOOD FIVE YEAR CAPITAL IMPROVEMENT PLAN (FISCAL YEARS 2017 TO 2022)

The City of Sherwood's Capital Improvement Plan (CIP) establishes, prioritizes, and defines funding for capital projects to improve existing systems and develop new infrastructure and facilities. The use of a CIP promotes better use of the City's limited financial resources, reduces costs, focuses priorities, and assists in the coordination of public and private development.

The City's CIP is a five year planning document which identifies the major capital improvement expenditures and gives a proposed sequence of implementing their construction. The CIP serves as a long range dynamic plan since the plan is reviewed and revised annually to account for completed and newly identified projects. In addition, City priorities may change due to funding opportunities or circumstances that have caused a more rapid deterioration of assets or greater need identified elsewhere.

As a basic tool for documenting anticipated capital improvement expenditures, the listing of projects includes "unfunded" projects in which needs have been identified, but specific solutions and funding resources have not been determined.

THE CIP PROCESS

The CIP is the result of an ongoing infrastructure planning process, which provides flexibility and takes advantage of opportunities for funding capital improvement expenditures. The Fiscal Years 2017-2022 CIP is developed utilizing adopted policies and current master plans, input from the public, professional peer review, and review and approval of the City's elected officials. A draft CIP is made available to the general public and elected officials for review and comment. Input from the public occurs at many levels. As Master Plans are developed and adopted, there are public input opportunities to ensure that the plans reflect community input and need.

Throughout the year staff and Council receive comments, suggestions and concerns from the public related to needed improvements which are incorporated into the CIP as appropriate. As part of the CIP development and adoption process for the one-year and five-year plans, the public is encouraged to provide comments. The CIP is presented to the City Council for adoption. The projects and project schedules shown in the CIP are part of the basis for preparation of the City's overall budget and staff allocations for that year.

HOW PROJECTS ARE ADDED TO OR REMOVED FROM THE CIP

The CIP development and review team consists of City staff and department directors who are responsible for development of the CIP project list, reviewing proposed CIP project scopes and schedules, and finally submitting recommendations to the City Manager. The City Manager recommendation is then presented to the City Council.

Typically there are more project requests than can be funded in the five-year CIP period, so the CIP Review Team conducts an internal project ranking of each project relative to all others. The criteria used in this internal ranking include, but are not limited to the following;

- Council Goals Supports the goals established by the City Council. Meets the city-wide long-term goals and is based upon Master Plan recommendations.
- Master Plan Proposed upgrade or expansion of infrastructure systems is identified in one of the City's Master Plans.
- Health and Safety Enhances, improves, or protects the overall health, safety and welfare of the City's residents.
- Regulatory Requirement Proposed upgrade or expansion satisfies regulatory or mandated requirements, standards and specifications.
- Outside Funding/Partnership That funding sources other than dedicated City resources, are identified, requested, committed, or
- Upgrade Serviceability To determine if the project has the potential to coincide with other CIP projects to minimize financial costs and development impacts, and to maintain and enhance the efficiency of providing services to the citizens of the City.

The CIP Review Team also considers public input received throughout the year along with additional identified areas of concern to determine if projects need to be added to the CIP master document. They then analyze the financial impact of the CIP as well as the City's ability to process, design, construct, and ultimately maintain the constructed infrastructure. It is the intent that the review team will meet periodically throughout the year to evaluate the progress of the projects, and determine future needs of the City.

The overall goal of the CIP Review Team is to develop CIP recommendations that:

- Preserve the past by investing in the continued upgrades of City assets and infrastructure;
- Protect the present by performing improvements to existing infrastructure and facilities; and
- Plan for the future.

Items such as minor equipment and routine expenses will not be included in the CIP as they are accounted for in other budget items of the City's annual budget. In addition, the operating or maintenance impact of the proposed CIP projects are not included in the CIP project costs. These costs will be accounted for in other budget items of the City's annual budget.

CIP CATEGORIES

Because there are several different funding sources for capital projects, which have limitations on how the funds can be used, projects within the CIP fall within 5 primary categories:

- 1) Transportation Projects
 - a) Transportation Capital Projects
 - b) Transportation Maintenance Projects
 - c) Pedestrian Capital Projects
 - d) Neighborhood Traffic Management/Calming
- 2) Utility Infrastructure Projects
 - a) Stormwater Capital Projects
 - b) Stormwater Maintenance Projects
 - c) Sanitary Sewer Capital Projects
 - d) Sanitary Sewer Maintenance Projects
 - e) Water System Capital Projects
 - f) Water System Maintenance Projects

- 3) General Construction Capital Projects
- 4) Urban Renewal Agency (URA) Projects
 - a) URA Capital Projects
- 5) Parks Projects
 - a) Parks Capital Projects

The CIP document is designed to forecast capital needs for the next five years. The CIP will be reviewed, revised and updated every year as part of the annual City budget development process.

HOW THE CIP IS FUNDED

The purpose of the CIP is two-fold. The one-year CIP identifies specific projects with certain funding availability which will be completed (or started) over the next fiscal year. The five-year CIP is a bit more aspirational as funding availability is not certain. The City may receive more or less revenue depending on development growth, and other revenue sources. In addition, the City may obtain outside funding for projects through grants, county, regional, state or federal allocation of funds. For this reason, the five-year CIP list may include more projects than will actually be able to be funded or constructed within the five-year time period. The CIP is updated annually in order to reflect new information and projections.

The nature and cost of the project generally determine the financing options as well as the projected revenue resources utilized by the project. The following financial resources are evaluated for funding use:

- Outside Funding including grants, federal, state, county funds and donations.
- Development Fees system development charges (SDC's).
- Utility Rate Revenue.
- Debt secured by a restricted revenue source.
- General Obligation Debt.

PROJECT LISTS AND DETAIL SHEETS

A complete listing of all the CIP projects is included in Section C. The one-year and five-year project descriptions are included in Section A and Section B of the CIP respectively.

The project detail sheet provides the following information:

- A project location map showing the location and extents of the project.
- The estimated project design/construction cost.
- Identifying which Project Ranking Criteria is being used.
- The project type and priority (e.g., short-term, medium-term, long-term).
- A project description along with a description of the long-term operating and maintenance issues and costs.
- The fiscal year funding is needed within and which funding sources are planned on being used.

ONE-YEAR CAPITAL IMPROVEMENT PROJECT LISTING

The following project list shows all capital projects (including those projects funded with operational, capital & other funds) proposed for the FY 2017-2018 budget cycle. These projects are a compilation of projects from the City's Master Plans, and Engineering and Public Works identified infrastructure improvement projects. Not all projects on this table are shown under the Current Year Capital Projects page of the budget, but all projects are included in the FY 2017-2018 budget. Projects not included in the Current Year Capital Project page are denoted with an asterisk (*) in the MP/Project # column.

Keyed Notes

- 1. Pre-design efforts needed to initiate full project design and construction in future fiscal years; construction costs not included in overall estimate.
- 2. Project is not identified under any Master Plan, but being performed as directed by City Council.
- Project budgeted amount based on funding by other than City funding sources (WACO Visitors Association – Bicycle Way Finding Grant, Metro – Nature in the Neighborhood Way Finding Grant).
- 4. Project not identified under Storm Master Plan, but is being undertaken to meet performance compliance requirements of Clean Water Services MS4 Permit.
- 5. Project is being designed and constructed under an Inter-Governmental Agreement (IGA) with WACO, and funded out of MSTIP-3d program. Costs shown here are City costs only for the land acquisition and staff time coordinating the project with Washington County.
- 6. Regionally funded project totaling \$5,977,000; only local match amount shown here.

CITY PROPERTY DERELICT HOUSE DEMOLITION

Department:	Engineering	MP Project #:	n/a
Category:	Capital Project-Transportation	Navision Job#	
Total Project Cost:	\$ 25,000		

Ranking Criteria Met		Project Type	Priority	
Council Goals	Regulatory Requirement	Maintenance	🗌 High 🔛 Medium 🔛 Low	
Master Plan	Outside Funding/Partnership	Replacement	🗌 High 🔛 Medium 🔛 Low	
Health & Safety	Upgrade Serviceability	New/Expansion	🛛 High 🗌 Medium 🔲 Low	
Project Description				
This project includes demolition of a derelict house included in the purchase of the property adjacent to Elwert Road. The house represents a health and safety liability to the City. The property was purchased with the intent of constructing intersection improvements to the Kruger/Elwert intersection. Pending Sherwood School District's High School project, house demolition process may occur earlier and be performed under the High School construction contract.				
Ongoing Maintenance Description and Estimated Annual Cost				
Demolition of the dere	Demolition of the derelict house and out buildings will not result in any annual maintenance expenses or actions.

Project Description						
This project includes construction of a dumbbell roundabout at the Tonquin Road/Oregon Street intersection and Murdock Road/Oregon Street intersection. Dumbbell roundabout modifies existing Murdock Road roundabout by disallowing east circulating lane, the new Tonquin Road roundabout section of the dumbbell disallows the westbound circulating lane. Adds a second westbound approach lane to the Murdock Road roundabout for separated westbound left and westbound through lanes. Keep three lanes on bridge structure. Project funding has not been identified, nor has a project design/construction schedule been established. The expectation is that funding will consist of a combination of City Transportation SDC's and Washington County TDT monies. Project includes purchase of necessary right-of-way lands.						
	Ongoing Maintenance Description and Estimated Annual Cost					

Public Works would have long-term maintenance of the new facility. Maintenance items will include landscaping, lane striping, pavement surface repairs, street sweeping and storm system cleaning.

🛛 Health & Safety	Upgrade Serviceability	New/Expansion	🛛 High 🗌 Medium 🔲 Low			
Project Description						
This project includes construction of a roundabout and relocation of the intersection of Kruger/Elwert Roads. This is joint						

City/County/State controlled project. The City has expended \$1.3 million to purchase the property needed for the relocation of the Kruger/Elwert intersection. This project will improve safety and traffic volume along Elwert. This project is identified on the FY2012 Federal Appropriations list for Congressional District #1, however the funding potential is considered low at this time. It is expected that ODOT and Washington County DLUT funding sources will be utilized for design and construction.

Master Plan	Outside Funding/Partnership	Replacement	🗌 High 🔛 Medium 🔲 Low			
Health & Safety	🛛 Upgrade Serviceability	New/Expansion	🗌 High 🔛 Medium 🔛 Low			
Project Description						
This project rehabilitates approximately 300 linear feet of Alexander Lane road surface from the Smith Avenue intersection to the end of Alexander Lane. This project rehabilitates the street surface by placing a new 2-inch AC pavement overlay on the existing pavement. The schedule for project design and construction has not been established for this project. The expectation is that funding will consist of street maintenance fund monies.						
Ongoing Maintenance Description and Estimated Annual Cost						
City Public Works staff will be responsible for the cleaning and maintenance of this road after construction is completed. However, being new construction, it is anticipated that this work will be minimal and consist mostly of cleaning of storm						

water catch basins, street sweeping, and leaf disposal.

Total Project Cost:	\$630,388		

Ranking Criteria Met		Project Type	Priority		
Council Goals	Regulatory Requirement	Maintenance	🗌 High 🗌 Medium 🔲 Low		
Master Plan	Outside Funding/Partnership	Replacement	🗌 High 🔛 Medium 🔲 Low		
Health & Safety	Upgrade Serviceability	New/Expansion	🛛 High 🗌 Medium 🗌 Low		
	Projec	ct Description			
This project includes installation of approximately 2,700 If of 10-inch diameter sanitary sewer mainline pipe from public trunk line located in Tonquin Road, east along the middle of the Tonquin Employment Area (TEA) to provide access to public sanitary sewer facilities for serving future TEA site development. Anticipate that need for mainline pipe installation will be within 5-years, or near term. Construction of mainline will be performed by private development in coordination with site development. SDC credits for oversizing the mainline pipe (between the standard 8-inch and required 10-inch size) will be available.					
Ongoing Maintenance Description and Estimated Annual Costs					

Public Works would have long-term maintenance of the new facility. Maintenance items will include regularly scheduled cleaning and video inspection for meeting CWS reporting requirements.

Master Plan	Outside Funding/Partnership	Replacement	🗌 High 🗌 Medium 🔲 Low			
Health & Safety	Upgrade Serviceability	New/Expansion	🗌 High 🛛 Medium 🔲 Low			
	Projec	ct Description				
This project includes installation of approximately 5,500 lf of 10-inch diameter PVC sanitary sewer mainline pipe from public trunk line located at the existing City limits between Cobble Court and Redfern Avenue, within the wetlands corridor. The 10-inch line size provides service to the Brookman Area only. If the line is to also serve the Sherwood West Concept Area, then the line size will be increased to 15-inch diameter HDPE. It is anticipated that construction of the pipeline to service the Brookman Area is within 5-years, or near term. Upsizing of the line to 15-inch will depend on the development pressure exhibited by the Sherwood West Concept Area at the time of development within the Brookman Area. SDC credits for oversizing the trunk line (between the standard 8-inch and required 10-inch or 15-inch size) will be available. Ongoing Maintenance Description and Estimated Annual Cost

MAINTENANCE/OPERATIONAL PROJECTS - CAPITALIZED

The following are operational projects being undertaken that will result in capitalized assets.

Project Title	Description	Estimated Project Cost	Estimated FY17/18 Expend.
Merryman Street Paving Rehabilitation	Construct new catch basins and repave Merryman	452,480	452,480
Willamette Street Paving Rehabilitation	Repave Willamette Street between Hall and Meissinger Place. Also includes construction of new catch basins	389,980	389,980
Tualatin Street Pavement Rehabilitation	Repave Tualatin between Washington and Pine. Also includes construction of new field inlet	149,515	149,515
Upper Roy from Willamette to Cochran - Streets	Repave Upper Roy from Willamette to Cochran	230,000	230,000
Upper Roy from Willamette to Cochran - Storm	Storm improvement within Upper Roy as part of re-paving project	30,000	30,000
Murdock Rd (North) Storm Water Facility	Design and construct new water quality swale and storm sewer on the south side of Murdock, near apartments	271,718	271,718
Citywide Catch Basin Remediation Program	Project consists of replacement of un-sumped catch basins located within the City's storm drainage conveyance system, in compliance with CWS's MS4 permit. The total number of un-sumped catch basins was estimated to be 300, with a 5 year time span estimated to complete full replacement	300,000	60,000
Daffodil Sanitary Sewer Maintenance	Design and construct sanitary sewer manhole replacement	41,000	41,000
Routine Waterline Replacement Program	This project includes replacement of pipe on a yearly cycle. Prioritization of locations updated based on known capacity of condition issues. Pipe material and pipe age	25,000	50,000
Upgrade SCADA System	Project will upgrade the existing system, which is over 10 years old, to increase reliability and to replace the collective appurtenances	75,000	75,000
Fire Flow - June Court	Upgrade 300 feet of 2-inch galvanized main with an addition of a fire hydrant on June Court from Cochran Avenue to end of cul-de-sac	43,000	43,000
